

Round 4: Prototype Submission

Announcement, IIT Madras BS Degree Programme

With Round 3 (PPT submission) now concluded, Round 4, the prototype submission round, is currently open. Your Round 3 PPT marks and your Round 4 prototype (or viva, for hardware teams) marks will be added together and evaluated as a single combined score. Please read this document carefully; it covers how the round works, what software and hardware teams each need to do, and the submission deadline.

1 How Round 4 Works

- **Round 4 (Prototype Submission) is now open, following the conclusion of Round 3 (PPT Submission).**
- Your Round 3 PPT marks and your Round 4 prototype (or viva, for hardware teams) marks will be added together into one combined score.
- This combined score is what decides your standing going forward, not either round in isolation.
- **Prototype Submission Deadline: 2 September 2026, 10:00 AM.**

2 Software Teams: What to Submit

- **Submit a working prototype that demonstrates your solution's core functionality.**
- A static design or mockup alone (for example, only a Figma file with no working logic behind it) does not qualify as a prototype.
- Partial or rough builds are accepted, as long as the core functionality you're demonstrating genuinely runs; it does not need to be feature-complete.
- **Also submit a short demo video of your prototype, under 3 minutes, showing the core functionality actually working.**
- Submission format details and the submission form will be shared with you separately, ahead of the deadline.

3 Hardware Teams: The Viva

- **Hardware-track teams will not submit a prototype file, since this hackathon is fully online.**
- Instead, your team will present and defend your solution in a live viva, a short scheduled video call (Google Meet or Zoom), one slot per team.
- **Also submit a simple circuit or architecture diagram of your hardware setup ahead of your viva slot.**
- Slot booking and diagram submission details will be shared separately, ahead of the deadline.
- Viva marks combine with Round 3 PPT marks the same way as prototype marks do for software teams.

4 What You Can and Cannot Do

YOU CAN

- Submit a partial or rough prototype if its core functionality genuinely runs.
- Use a deployed link or repository link alongside your video for anything hard to show in 3 minutes.
- Request a hardware viva slot if your problem statement needs physical hardware.
- Reach out to the organizers before the deadline if you're unsure whether your submission qualifies.

YOU CANNOT

- Submit a static mockup or design file as your entire prototype.
- Submit a demo video over 3 minutes; only the first 3 minutes will be evaluated.
- Miss your scheduled viva slot without informing organizers in advance.
- Submit after the deadline; late work will not be evaluated.
- Present a prototype that isn't your own work.

SUBMISSION DEADLINE **2 September 2026, 10:00 AM**
